**To Whom It May Concern:**

I am providing this *letter of reference* on behalf of Copperstate Fire Protection who has been providing Fire Protection Services to facilities under my directive for **Banner Gateway, Banner Cancer Center, and Banner Gateway PMOB.**

One of our requirements for selecting them as a service provider was their ability to provide web based code compliant barcoded inspections. These barcoded inspections provide us with the ability to verify inspections are physically completed which exceeds standards for fire protection services.

Copperstate Fire Protection has shown the required code knowledge and technical expertise to complete code compliant Inspections, Repairs, and Documentation on the Notifier network systems installed within our facilities. These have all been completed to Banners level of expectation.

Please feel free to contact me should you need any further clarifications about Copperstate Fire Protection or the services they provide to the facilities under my directive.

Sincerely,

Scott Watson  
Director Facility Services  
Banner Gateway Medical Center  
MD Anderson Cancer Center
