

BRIGNALL
CONSTRUCTION

November 16, 2012

To Whom it May Concern:

I'd like to take this opportunity to write a letter of recommendation for Copperstate Fire Protection, specifically Mr. Tim Snow and his very professional team. My most recent project with Copperstate Fire included installation of new fire alarm systems, while the existing systems had to remain operational, at six (6) Elementary Schools for the Paradise Valley School District. Four (4) of these schools were completed concurrently over the very short summer break with a late project award from the District. To make this possible, Copperstate Fire masterfully fast-tracked the first four (4) sets of Fire Alarm drawings and permits by working closely with the Engineer of Record and the City of Phoenix Fire Department. The remaining two (2) schools were completed after hours to minimize disruption to the ongoing operations at the school sites.

In addition, Copperstate was instrumental in initiating and implementing a District wide upgrade to bring the Notifier ONYXWorks Addressable System online and provide remote access for many of the Paradise Valley schools.

Copperstate's experienced personnel and comprehensive project approach earned the respect of the entire project team including the Engineer of Record, the School District, City of Phoenix Fire Department Inspector, and Brignall Construction.

It is a pleasure to work with Copperstate Fire and I highly recommend them as a partner on any project. Please feel free to contact me if you have any questions.

Respectfully,
Brignall Construction Co., Inc.
