

Emergency Communications — *Inform Everyone*

NOTIFIER's Emergency Communications Systems (ECS) Provide Complete Coverage Both Inside and Outside the Building

Leveraging the existing NOTIFIER ONYXWORKS infrastructure provides a comprehensive life safety system and a central point of control for fire and any other emergency events. NOTIFIER offers a complete solution of integrated ECS products, including:

- Interior voice systems
- Local operator consoles throughout the facility to enable staff to quickly and easily initiate emergency notifications
- Exterior speakers to inform students, staff and visitors in the outdoor parking lots or recreational areas of the facility
- LED signage for high-noise areas
- Distributed recipient messaging to reach students and staff regardless of their location

NOTIFIER's ECS solutions, together with our state of the art fire and gas detection systems, provides for a powerful and complete Life Safety System for your facilities. Learn how NOTIFIER and Copperstate Fire Protection can help design a system that provides complete coverage to ensure the safety of your students, staff & visitors at all times.

NOTIFIER — The Voice of Experience

NOTIFIER continuously develops new technologies that improve fire and life safety — an unwavering commitment for over sixty years. We have decades of experience designing and manufacturing the industry's most advanced fire alarm and voice evacuation systems. Furthermore, our emergency communications solutions can easily and seamlessly integrate with NOTIFIER fire alarm systems.
